Status

Consider:

- State of disease process
 - Status of medical home
 - WCE schedule, immunization status, follow up with specialist if needed
-

Guidelines & Notes:

•

	1	2	3	4	5
	None	Minimal	Basic	Adequate	Superior
Knowledge	Does not know how and <u>when</u> to access care	Knows how and when to seek care for obvious medical emergencies, but not for chronic or acute illness or preventive care	Knows how and when to seek care for obvious medical emergencies; how and sometimes when to seek care for chronic and acute illness; does not know how or when to seek preventive care	Knows how and when to seek care for obvious medical emergencies; how and when to seek care for chronic and acute illness; how but not when to seek preventive care	Knows when and how to seek emergency, chronic, and acute illness and preventive care
	Not Appropriate	Rarely Appropriate	Inconsistently Appropriate	Usually Appropriate	Consistently Appropriate
Behavior	Does not follow prescribed/ recommended treatment plan and preventive care for adult, child and oral health	Follows a limited portion of prescribed/ recommended treatment plan and preventive care for adult, child and oral health. Does not find medical home. Rarely uses health care resources appropriately.	Follows some of prescribed/ recommended treatment plan and preventive care for adult, child and oral health. Discusses need for medical home, attempting to find one. Inconsistently uses health care resources appropriately.	Follows most of prescribed/ recommended treatment plan and preventive care for adult, child and oral health. Has located but not used medical home. Usually uses health care resources appropriately.	Follows prescribed/ recommended treatment plan and preventive care for adult, child and oral health. Consistently uses medical home. Always uses health care resources appropriately.
	Extreme S/S	Severe S/S	Moderate S/S	Minimal S/S	No S/S
Status	Receives no health care.	Rarely receives appropriate, timely health care. No medical home.	Sometimes receives appropriate, timely health care.	Usually receives appropriate, timely health care.	Receives appropriate, timely health care. Has medical home.

Health Care Supervision: (Pg. 346)

Management of the health care treatment plan by health care providers.

Signs/Symptoms

- Fails to obtain routine/ preventive health care
- Fails to seek care for symptoms requiring evaluation/treatment
- Fails to return as requested to health care provider
- Inability to coordinate multiple appointments/ treatment plans
- Inconsistent source of health care
- Inadequate source of health care
- Inadequate treatment plan
- Other

KBS rating considerations:

- Knowledge**
(What caregiver knows)
Consider caregiver's knowledge of:
- Health, wellness, disease process
 - Health care beliefs and accuracy of medical information
 - How to use emergency care, primary care, and specialty care resources

- Behavior**
(What caregiver does)
Consider caregiver's behavior:
- Use of ER, preventive care visits and choices of providers
 - History of medical care behavior and current challenges
 - If caregiver arranges and follows through with plan of care, and appointments independently

- Status**
(How the child is)
Consider child's status:
- State of disease process
 - History of medical care behavior and current challenges
 - Access to primary and specialty health care and medical home

Guidelines & Notes:

- Child problem/pathway
- Assess caregiver's knowledge and behavior
- Assess child's status

Health Care Supervision – Child Page 346

	1	2	3	4	5
	None	Minimal	Basic	Adequate	Superior
Caregiver's Knowledge	<ul style="list-style-type: none"> • Does not know how to access health care providers or resources to help with health care • Does not know when to seek health care for physical or mental illness, injuries, or chronic health conditions • Does not know preventative/wellness health care practices • Believes in myths or inaccurate health practices or has mistrust of providers that prevents usage of health care services 	<ul style="list-style-type: none"> • Has little knowledge of health care providers and resources to access care • Has little knowledge on when to seek care for physical or mental illness, injuries, or chronic health conditions • Has little knowledge of preventative/wellness care practices • Often has belief in myths or inaccurate health practices or has some mistrust of providers that prevents usage of health care services 	<ul style="list-style-type: none"> • Has some knowledge of health care providers and resources to access care • Has some knowledge on when to seek care for physical or mental illness, injuries, or chronic health conditions • Has some knowledge of preventative/wellness care practices • Sometimes has belief in myths or inaccurate health practices or sometimes has mistrust of providers 	<ul style="list-style-type: none"> • Has good knowledge of health care providers and resources to access care • Has good knowledge on when to seek care for physical or mental illness, injuries, or chronic health conditions • Has good knowledge of preventative/wellness care and articulates its importance • Usually understands the importance of health care practices and access 	<ul style="list-style-type: none"> • Has exceptional knowledge of health care providers and resources to access care • Has excellent knowledge on when to seek care for physical or mental illness, injuries, or chronic health conditions • Has excellent knowledge of preventative/wellness care and can articulate examples • Fully understands the importance of health care practices and access
	Extreme Concern	Severe Concern	Moderate Concern	Minimal Concern	No Concern
